KODY TECHNOLAB LIMITED

Company Profile:

Kody Technolab Limited is a NSE listed leading custom software development company, delivering innovative and scalable solutions tailored to business needs. We are experts in Java, Machine Learning, and Mobile Application-based enterprise software development. We have a range of Robotics products developed in-house to supercharge client business operations with a wide range of AI-powered autonomous robots. We help businesses stay ahead in the digital landscape. Our team of skilled professionals leverages the latest technologies to build high-performance software, ensuring seamless user experiences and efficient system integrations. Whether it's web, mobile, or automation, we transform ideas into reality with precision and innovation.

Join us on this exciting journey...!

JOB DESCRIPTION FOR OPEN POSITION

1. Trainee Machine Learning Engineer

1. Experience	Fresher
2. Education	MCA, MSc-IT, B.E., BTech, MTech, M.E. in Computer Science, IT
3. Timings	10:00am to 7:00pm
4. Location	Iscon Cross Road, Ahmedabad

Join our team as a Trainee Machine Learning Engineer! This is a learning-focused role designed for students who are passionate about artificial intelligence and machine learning and want to explore real-world applications of these technologies. You will work alongside our experienced team to learn how to build, train, and deploy intelligent models that can solve practical problems.

In this role, you will gain hands-on experience with data preprocessing, model development, and performance evaluation while contributing to exciting AI-driven projects. This internship is a great opportunity to strengthen your fundamentals in machine learning, work with modern tools and frameworks, and understand how AI solutions are implemented in production environments.

Key Responsibilities:

- Participate in structured training on Python programming and fundamentals of machine learning and data science.
- Complete assigned tutorials, exercises, and mini projects.
- Apply learned concepts to build basic Machine Learning, Deep Learning, Generative AI models.
- Learning Computer Vision libraries and working on image processing.
- Clearly document the learnings, experiments, and code developed.
- Assist and participate in data collection, cleaning, and preprocessing for various projects.
- Support ml model development, training, and evaluation.
- Collaborate with team members to contribute to real-world AI/ML tasks.

Required Qualifications:

- Pursuing MCA, MSc-IT, B.E., BTech, MTech, M.E. in Computer Science, IT, or related fields.
- Good understanding of Python programming language.
- Strong foundational knowledge of Object-Oriented Programming (OOP) concepts.
- Strong willingness to learn and grow in the AI/ML domain
- Good analytical thinking and problem-solving skills
- Ability to follow structured learning and complete assignments on time

Preferred Skills (Optional):

- Familiarity with Python libraries such as NumPy, Pandas, Scikit-learn
- Knowledge of backend frameworks such as Fast API or Flask
- Basic knowledge of C++
- Exposure to data analysis, visualization, or personal AI/ML project

2. Trainee iOS Developer

1. Experience	Fresher
2. Education	Btech [IT, CS, CA] , BE [IT, CS, CA] , MCA , MSC
3. Timings	10:00am to 7:00pm
4. Location	Iscon Cross Road, Ahmedabad

Start your career in the Apple ecosystem as a Trainee iOS Developer. If you are fascinated by iPhones, iPads, and Mac applications, this role will introduce you to native iOS development. You will learn how to write code in Swift and use Apple's official tools under the guidance of experienced engineers.

Key Responsibilities:

- Learn the basics of the Swift programming language and the iOS development environment.
- Assist in designing and building simple user interfaces using Swift UI or UI Kit.
- Work alongside senior developers to understand how mobile apps interact with the internet and databases.
- Help the QA and development teams by testing apps and reporting bugs.
- Actively participate in code review sessions to learn best practices from senior engineers.

Required Skills:

- Pursuing MCA, MSc-IT, B.E., BTech, MTech, M.E. in Computer Science, IT, or related fields.
- Solid grasp of programming fundamentals and logical problem-solving.
- Experience with any object-oriented language (C++, Java, etc.); prior exposure to Swift is a bonus but not required.
- Passion for the Apple ecosystem and mobile technology.
- High willingness to learn, adapt, and accept constructive feedback.
- Basic understanding of version control (like Git) through college projects is a plus.

3. Trainee Flutter Developer

1. Experience	Fresher
2. Education	Btech [IT, CS,CA] , BE [IT,CS,CA] , MCA , MSC
3. Timings	10:00am to 7:00pm
4. Location	Iscon Cross Road, Ahmedabad

Join our team as a Trainee Flutter Developer! This is a learning-focused role designed for students who are passionate about mobile development and want to explore cross-platform technologies. You will work alongside our experienced developers and learn how to build applications that run on multiple platforms from a single codebase.

Key Responsibilities:

- Learn the Dart programming language and the fundamentals of the Flutter framework.
- Assist the development team in building and testing basic UI components and screens.
- Collaborate with senior developers to understand mobile app architecture and data flow.
- Help identify and fix minor bugs to gain hands-on experience with debugging processes.
- Participate in daily team meetings and learn agile development practices.

Required Skills:

- Pursuing MCA, MSc-IT, B.E., BTech, MTech, M.E. in Computer Science, IT, or related fields.
- Strong foundational knowledge of Object-Oriented Programming (OOP) concepts.
- Familiarity with any programming language (like C++, Java, or Python); basic knowledge of Dart or Flutter is a big plus, but not mandatory.
- A genuine curiosity about mobile app development and cross-platform technologies.
- Good problem-solving skills and the ability to work well in a team.
- At least one academic or hobby programming project to showcase your coding logic.

4. Trainee Android Developer

1. Experience	Fresher
2. Education	Btech [IT, CS,CA] , BE [IT,CS,CA] , MCA , MSC
3. Timings	10:00am to 7:00pm
4. Location	Iscon Cross Road, Ahmedabad

Kickstart your mobile development journey as a Trainee Android Developer. We are looking for enthusiastic students who want to learn how to build native Android applications. You will get hands-on experience with real-world development tools and learn how to translate code into functional mobile apps.

Key Responsibilities:

- Learn native Android development using Kotlin and Java under the guidance of experienced engineers.
- Assist in writing clean, readable code for basic application features.
- Work with senior developers to understand the Android application lifecycle and UI design principles.
- Help test the application on different Android devices and emulators to catch crashes or bugs.
- Read and understand technical documentation to solve basic development challenges.

Required Skills:

- Pursuing MCA, MSc-IT, B.E., BTech, MTech, M.E. in Computer Science, IT, or related fields.
- Clear understanding of basic Data Structures, Algorithms, and Object-Oriented Programming.
- Academic experience with Java or Kotlin.
- Basic familiarity with Android Studio is preferred.

- Eagerness to learn and a proactive attitude toward taking on small coding challenges.
- Good communication skills to ask questions and collaborate with mentors.

5. Trainee Java Developer

1. Experience	Fresher
2. Education	MCA, MSc-IT, B.E., BTech, MTech, M.E. in Computer Science, IT
3. Timings	10:00am to 7:00pm
4. Location	Iscon Cross Road, Ahmedabad

Join our team as a Trainee Java Developer! This is a learning-focused role designed for students who are passionate about backend development and want to build strong fundamentals in Java programming. You will work closely with our experienced development team to understand how scalable and efficient applications are designed, developed, and maintained in real-world environments.

In this role, you will gain hands-on experience in core Java concepts, object-oriented programming, and database interactions while contributing to live projects. This internship is a great opportunity to strengthen your programming skills, learn industry best practices, and understand how backend systems are built and deployed.

Key Responsibilities:

- Participate in structured training on **Core Java, Spring, Spring Boot and backend development fundamentals**
- Complete assigned tutorials, coding exercises, and mini projects
- Apply learned concepts to develop small-scale applications
- Write clean, maintainable, and well-documented code
- Assist in debugging, testing, and improving application performance
- Work with databases to perform CRUD operations
- Learn and implement **Java Collections Framework and data structures**
- Collaborate with team members on real-world development tasks

Required Skills:

- Pursuing degree in **MCA, MSc-IT, B.E., BTech, MTech, M.E.** in Computer Science, IT, or a related field
- Basic understanding of **Core Java programming** and **Data Structures and Algorithms concepts**
- Strong knowledge of **Object-Oriented Programming (OOP)** concepts
- Understanding of **exception handling, string manipulation, and file handling (I/O)**
- Basic knowledge of **JVM, memory management, and garbage collection**
- Familiarity with **control flow, arrays, methods, and basic data structures**
- Knowledge of **Java Collections Framework (List, Set, Map, Queue)**
- Logical and analytical thinking with problem-solving ability

- Familiarity with any IDE such as **Eclipse, STS or VS Code**
- Basic understanding of **SQL and relational databases (MySQL/PostgreSQL)**
- Ability to follow structured learning and complete tasks on time

Preferred Skills (Optional):

- Familiarity with **Spring Framework basics (Spring Core, IoC, Dependency Injection, Spring MVC, Spring Boot)**
- Basic understanding of **REST APIs and Web Application Development**
- Exposure to **Git and GitHub for version control**

6. Trainee Robotics Software Engineer

Join our team as a Trainee Robotics Software Engineer! This is a learning-focused role designed for students who are interested in robotics and want to gain hands-on experience with real-world robotic systems using ROS. You will work alongside our R&D team to understand how robot software is developed, tested, and deployed.

In this role, you will learn how to build basic ROS applications, work with robot sensors, and implement simple robotic behaviors. This internship is a great opportunity to strengthen your programming fundamentals, understand system integration, and contribute to real robotics projects.

Key Responsibilities:

- Participate in structured training on ROS, programming, and robotics fundamentals
- Complete assigned exercises, tutorials, and mini projects
- Learn and develop basic ROS nodes and communication workflows
- Assist in building and testing small modules of robotic systems
- Debug basic software and hardware integration issues with guidance
- Document findings, experiments, and code
- Collaborate with team members on assigned robotics tasks
- Participate in daily updates and follow development timelines

Required Skills:

- Pursuing degree in B.E./BTech/M.E./MTech (Robotics, Mechatronics or related fields)
- Basic understanding of C++ or Python programming
- Familiarity with Object-Oriented Programming concepts
- Basic understanding of ROS concepts (nodes, topics, services) is a plus
- Comfortable using Linux/Ubuntu and terminal
- Strong willingness to learn and explore robotics systems
- Good problem-solving and logical thinking skills
- Preferred Skills (Optional):
- Exposure to Gazebo or similar simulation tools
- Basic knowledge of key robotics sensors (LiDAR, IMU, camera, encoders)
- Familiarity with Git/GitHub
- Robotics project or related competition participation experience

7. Trainee Embedded Systems Engineer

Join our team as a Trainee Embedded Firmware Engineer! This is a learning-focused role designed for students who are interested in embedded systems and robotics. You will work with our R&D team to develop and test firmware for robotic platforms and gain hands-on experience with microcontrollers and hardware systems.

In this role, you will learn how to interface sensors, control actuators, and debug embedded systems. This internship is a great opportunity to build strong fundamentals in embedded programming and understand how hardware and software work together in real-world robotics applications.

Key Responsibilities:

- Participate in structured training on embedded systems and firmware development
- Complete hands-on exercises with microcontrollers and sensors
- Assist in developing simple firmware modules (sensor reading, motor control)
- Support integration of sensors and actuators
- Debug basic hardware and firmware issues with guidance
- Document learnings, code, and hardware connections
- Collaborate with team members on embedded development tasks
- Follow timelines and participate in regular progress updates

Required Skills:

- Pursuing degree in B.E./BTech/M.E./MTech (ECE, EE, Mechatronics or related fields)
- Basic understanding of Embedded C programming
- Exposure to microcontrollers like STM32, ESP32, or Arduino
- Understanding of basic electronics components and concepts (voltage, current, circuits)
- Basic idea of communication protocols (UART, I2C, or SPI)
- Strong willingness to learn embedded systems
- Good analytical and problem-solving skills

Preferred Skills (Optional):

- Basic knowledge of C++ or Python
- Familiarity with Arduino IDE or similar tools
- Exposure to robotics systems or ROS
- Electronics / Robotics project or related competition participation experience
